

1 General Instructions

1.1 How to start

To start using this template, you can:

1. Use it in your browser with Overleaf
 - Download this project as a .zip folder.
 - Load the .zip folder in Overleaf
 - Adapt, change it, write, and compile it in any .tex file of your project (Ctrl + S)
2. Use it with your own Tex Editor. We recommend TexStudio.
 - Download TexStudio TexStudio
 - Install the necessary packages, which are: babel, microtype, parskip, fourier, fancyhdr, hyperref, apacite, geometry, graphicx, caption, amsmath, gensymb, enumitem.
 - Obs: If you try to compile main.tex you'll receive a message suggesting to install the packages already.
 - Of course you can delete some of these packages if you'll not use them, as well as add more if you need.

1.2 General Remarks

1. Pay attention to proofreading in whichever Tex editor you use. Define if you'll use English (UK) or English (USA).

2 Recommended Books on Scientific Writing

1. Manual for Writers of Research Papers, Theses, and Dissertations, Chicago Style for Students and Researchers (Manual for Writers of Research Papers, Theses and Dissertations)
2. Science Research Writing For Non-Native Speakers Of English, Imperial College London
